Updates

Plug-in Smart Bypass

Sealed relay for tippers

TV208W Red QuickSplice

A new, top quality red splice connector.

Cheap red "scotchlok" type connectors have got less and less reliable in recent years as their manufacturers have fought to keep the price down; so we've searched for something better.

What we now have is something infinitely better, a quick splice with really good separation of the wires and twin splice blades to make a connection that is doubly sure. If the pursuit of a low price has been driving out quality, the new TF208W brings it back.

Note the separate "tunnel" for the tap wire and the twin blades of the metal splice connection

TV2094 Posi-Tap

This was recommended by a customer. It makes an excellent job of "big" connections when you can't pick up power from the fusebox using a PowerTap. We think it would be a useful item to have to hand.

Wire capacity, tap and accessory: 1.5 mm² to 3mm².

Posi-Tap™ TAP CONNECTOR

- TAPS WIRES WITHOUT CUTTING
- TOTAL WIRE INTEGRITY IS MAINTAINED
- INSTALLS IN SECONDS BY HAND
- NO CRIMPING OR TOOLS REQUIRED
- REUSABLE OR PERMANENT
- LESS RESISTANCE
- VIBRATION PROOF
- FULLY INSULATED

POWERS UP TO (4) LEADS AT ONCE!

QUICK & EASY

- 1** Insert Hot Wire
- 2** Tighten
- 3** Strip Leads
- 4** Insert & Tighten

SuperSplice Connector Kits, the easiest way to tap into a circuit.

SuperSplice puts a set of mini sockets onto the host circuit.
You connect your wires to the SuperSplice plug and just plug it in.

Putting a 3-way splice socket onto a pair of host wires

Insert the splice socket into the tool and push it to the bottom

Separate the host wires and apply them to the splice socket one-by-one.

Trigger-pressure pushes the host wires firmly home into the splice to make a gas-tight connection.

Remove the splice socket from the gun and slide the cap into place

A neat plug is formed

Connect your new wires to the SuperSplice plug and plug it in.

Your new, pluggable connection is made.

Details & Prices

Part number	Description
TV2083	SuperSplice 3-way connector, 10 pack
TV2083-25	SuperSplice 3-way connector, 25 pack
TV2083-25TT	SuperSplice 3 way 25 pack & tool
TV2086	SuperSplice 6-way connector 10 pack
TV2086-25	SuperSplice 6-way connector 25 pack
TV2086-25TT	SuperSplice 6 way 25 pack & tool
TT7052	Supersplice Multi connector tool

TV2086
3-way set, connected

TV2086
6-way splice socket and header

Weatherproof Metal Enclosures

We had a long search for good, weatherproof boxes at a reasonable price for the LEDMaster products. Now we have them in stock, they are available for sale. We also have the weather proof glands to bring in the cables.

(Tip: you have to drill them for cable entry: a simple cone drill bit does the job well.)

BU9101 153 x 83 x 50mm

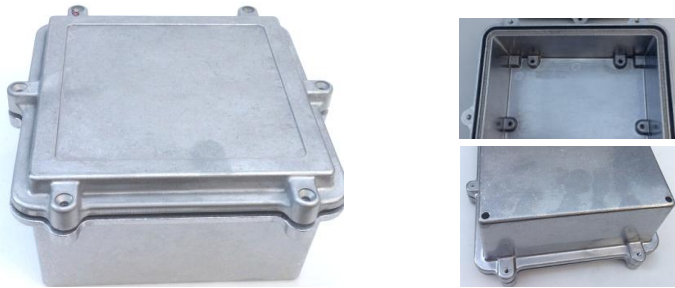

Inside walls are ribbed

Flanged box

Weatherproof to IP67

Ribbed walls hold printed circuit boards, etc.

BU9124 162 x 162 x 80mm

Base-mounted box

Mounting holes inside hold printed circuit boards, etc

Corner holes in base accept mounting screws. Holes are isolated from box interior
Weatherproof to IP67

TV22051 Weatherproof gland. (See TV21751 above. Provide sealed cable entry)

Plug-in Smart Bypass

The new plug-in style has now replaced the hard wired style on the standard Smart Bypass and is very popular. If you haven't had one yet, they well worth a try

Sealed Tipper relay

For when the relay has to be exposed to the elements – and worse

This has been well received since we first offered it in 2011. It's for tippers and chassis cabs. Connect one end in the cab and put the trailer socket on the other

TF2218/7TP.
