

TF5101 EU-US Trailer Adapter

This device must only be used in conjunction with a TF2218/7H bypass relay

To fit the TF5101, please follow these instructions:

- Apply power to the '+12V in' terminal.
- Connect the 'Chassis' terminal directly to the chassis.
- Tap into the vehicle's feed to the left hand stop light and wire it to the 'LH Stop IN' terminal.
- Tap into the vehicle's feed for the right hand stop light and wire it to the 'RH Stop IN' terminal.
- Connect the 'LH Flasher' output to the LH Flasher input (yellow) on the TF2218/7H.
- Connect the 'RH Flasher' output to the RH Flasher input (green) on the TF2218/7H.
- Connect the 'Stops' output to the Stops input (red) on the TF2218/7H.
- Side Lights, Fog, and Reverse feeds bypass the adapter and connect directly to the TF2218/7H in the usual way.
